DATE: October 26, 2009

## LOCATION

MCB Camp Lejeune, Jacksonville, North Carolina

## MINUTES

### I. Welcome and Introductions

### II. Installation Restoration Program (IRP) and Munitions Response Program (MRP) Site Tour

A tour guide was provided to the RAB that included historical information and current status for each site. The following sites were visited:

#### Air Station:

- UXO-01
- Site 35
- Site 89
- Site 86

#### Courthouse Bay:

- Site 73

#### Mainside:

- Site 88
- Site 82

### **III. RAB Business**

The RAB was informed of the planned update to the Community Involvement Plan. The last update was conducted in 2005. The Community Involvement Plan outlines the community participation efforts for the Installation Restoration Program. An important element of the update is to get input from the community, RAB members, and local officials to gauge how the Base is implementing and can improve community involvement. Self-addressed questionnaires with return postage were mailed to the RAB for input and available at the meeting. A community involvement specialist will be interviewing community members, Base workers, and elected officials in November.

Mr. Lowder indicated that the next RAB meeting will be scheduled for mid to late January 2010 at Coastal Carolina Community College. An email will be sent to the RAB members for available dates.
