

## COMMANDING OFFICER'S SAFETY POLICY STATEMENT

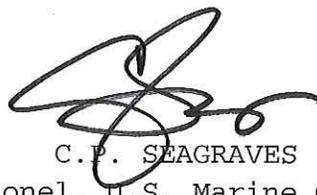

Safety is everyone's responsibility; our goal is to create a safety culture where Marines, Sailors and civilian Marines are applying risk mitigation to daily tasks on and off-duty.

Safety is an integral part of everything we do. Our culture is based on safety and we have reduced mishaps. Continue to build on this success. Continue to THINK, DECIDE, and ACT and we will continue to reduce mishaps. Everyone should be encouraged to speak up when a safety concern is present. This is the only way to truly affect the preservation of our force.

Your Commandant, your Commanding General and your Commanding Officer are charging each and every one of you to become a "safety officer" in your office or workplace. Diligence is the key to identifying unsafe activity, knowledge is the key to assess the unsafe activity and personal fortitude is the key to stepping forward and acting. Continue to mitigate risks and keep our organization ready.

You are the life blood of MCIEAST-MCBCAMLEJ. Continuously supporting the operational forces, tenant commands and military families on our base requires everyone. Stay actively engaged by making timely, sound and safe decisions.
