# Household Hazardous Material Collection Program Brochure

## *Why Turn In Your Household Hazardous Materials (HHM)?*

- Each home contains between three and eight gallons of hazardous materials in kitchens, bathrooms, garages, and basements; properly disposing of HHM can reduce the environmental impact.
- Pouring HHM down household drains can contaminate the wastewater treatment system.
- Dumping HHM down stormwater drains significantly degrades water quality and threatens aquatic life, wildlife, and human health.
- Disposing of HHM in household garbage puts the health and safety of the sanitation workers at risk.
- The HHM drop-off process is easy and convenient.
- Bring your unwanted HHM to Building 977 A/B Michael road and one of our specialists will assist you.

## How to Identify HHM

Numerous everyday products that you have in your home may contain ingredients that can be harmful if not stored, used and disposed of properly. It is important to identify these products and take the appropriate precautions. Manufacturers are required to identify hazardous products with warning labels as shown below:

### Toxic Materials

Examples include pest fumigants, ant traps, and old fire extinguishers. Materials may be carcinogenic.

"DANGER/POISON" or "WARNING—KEEP OUT OF REACH OF CHILDREN."

### Corrosive Agents

Examples are drain cleaners, rust removers, and oven cleaners. Corrosives can burn skin and mucous membranes.

"CORROSIVE—AVOID CONTACT WITH SKIN OR EYES."

### Oxidizers

Examples include chlorinated pool chemicals and various peroxides. These chemicals react strongly with other compounds and may cause fires or explosions.

"WARNING—STRONG OXIDIZER."

### Flammables

Examples include gasoline, kerosene, fuel oil, butane, oil-based paints, and paint thinners.

"FLAMMABLE—KEEP AWAY FROM ANY SOURCE OF IGNITION"

## Disposing of Unwanted Products

- Only active duty military and dependents residing in base housing can participate in the program; **bring your military ID for validation**.
- All products must be in the original, closed and secure containers with **legible** labels.

### Acceptable

Household Cleaners  
Solvent/Thinners

Wood Preservatives  
Automotive Fluids  
Paints/Polishes  
Lighter Fluid  
Used Motor Oil  
Pesticides/  
Herbicides  
Fluorescent Bulbs  
Non-automotive  
Batteries

### Unacceptable

Ammunition  
Explosive Material  
Radioactive  
Material  
Smoke Alarms  
Printer Cartridges  
Recyclable Material  
Automotive  
Batteries

**HOURS:**  
Monday – Friday  
0730 to 1500

**LOCATION:**  
Bldg 977A/B, Michael  
Road.

## Consider Safer Alternatives

Instead of:	Try this:
All Purpose Cleaner	Mix ½ cup white vinegar and 1 tsp baking soda.
Carpet Cleaner	Sprinkle with cornstarch; vacuum.
Oven Cleaner	Use steel wool and baking soda.
Toilet Cleaner	Scrub with baking soda or powdered bleach.
Glass Cleaner	Combine 2 tbsp vinegar and 1 qt warm water.
Drain Cleaner	Pour 1 cup baking soda down the drain; follow with ½ cup white vinegar. Flush with hot water.
Scouring Powder	Mix 4 tbsp baking soda with 1 qt warm water.
Disinfectant	Substitute ½ cup borax and 1 gl water.
Ant Poison	Use chili powder; sprinkle at places of entry.
Houseplant Insecticides	Spray plants weekly with lukewarm soapy water and rinse well.
Furniture Polish	Mix 1 part lemon juice to 1 part olive oil.
Oil/Enamel-Based Paints	Substitute latex or water-based paint.
Floor Cleaner	Combine 1 cup white vinegar with 2 gl water. Polish with club soda.
Air Freshener	Burn scented candles or boil cinnamon in water.
