

## **MCI-EAST Priorities (January 2025)**

### **FIGHT TODAY**

#### **(Immediate Requirements- MEF Readiness)**

**-Provide** a secure environment for tenants and families **in order to** enable life-support, ForceGen operations and training within, power projection from and recovery to our installations.

##### **LOE 1- Enable and Support II MEF and Tenants**

- Garrison support vectored toward tenant unit mission success
- Mobility and maneuver enhanced ISO MEF Deployments & Exercises
- Range Support and development modernization ICW FD 2030

**-Enhance** survivability, sustainability, and infrastructure improvements **in order to** build resiliency, create redundancy and when required, enable rapid recovery of critical capabilities and life support aboard the installations across the region enabling combat ready forces.

##### **LOE 2- Deter the Threat**

- Deterrence Plan ACPs and Perimeter Hardened - resourcing & funding
- Robust Destructive Weather planning and crisis response preparation
- Security Planning through regular "Fight the Base" exercises icw II MEF
- CUAS Fielding and employment development
- IT Infrastructure hardening and capabilities resiliency/redundancy planning

### **FIGHT TOMORROW**

#### **(Long-Range Planning- Force Modernization Requirements)**

**-Create** A Base Master Plan to enable force modernization through integrated Operational Force training requirements with installation training areas and facilities **in order to** generate informed long-range installation capabilities to prepare tenant units for the future operational requirements across the spectrum of conflict.

##### **LOE 1- Installation Development and Infrastructure Resilience**

- Integrate CMC's Force Design Commander's Intent in planning development
- Avoid internal/external encroachment on existing training areas
- Include Weapons systems enhancements and Unit Basing potential options
- Prioritize MILCON to enable the "Maritime Center of Excellence" concept
- Incorporate Resilient-Energy and Encroachment Planning
- **End state:** Infrastructure resiliency to physical and organizational stressors

## **CONTINUING ACTIONS** **(Enduring Efforts- Centers of Gravity)**

**-Continue and build upon** community relations and partnering efforts to strengthen key partnerships with strategic stakeholders across the region **in order to** not only maintain but improve and enhance our Installations' posture across the region.

### **LOE 1- Lead and influence a team of Installation Stakeholders**

- Government and External Affairs and Key Leader Engagement Planning
- Continued School Liaison coordination with DoDEA/Base and local schools
- Small Business Outreach

### **LOE 2- Optimize Installation Operations**

- Force Design Modernization
- Area Commander inclusion and engagement (Base Professional Appearance)
- Generate MCIEAST Ready Requirements IOT capitalize on resource availability
- Talent Retention
- Internal Inspections
- Follow budget execution and obligation timelines
- Identify resourcing challenges and associated funding requirements

**-Care for** our workforce and families (uniformed & civilian) **in order to** strengthen our team!

### **LOE 1- Regional Installation Quality of Life (QOL) efforts**

- Barracks and Accompanied Housing
- Family Programs / Single Marine Program
- Schools and CDCs
- Mess Halls
- MCCA supported retail activities
- MCCA supported Behavioral Health activities

**\*Respect for all, by all, always.**

**\*Mission first, people always...We will do both!**

Lets move out, draw fire!

Semper Fidelis!
